Como moneda.

TEMP: Muy bien fija.

VISUALS: COLORES: Verde oscuro.

Gris

Amarillo.

Marrón

Como un tronco.

LUMS: Oscuro en general

CONTRAST: Alto.

1ª Conclusión o historia lineal:

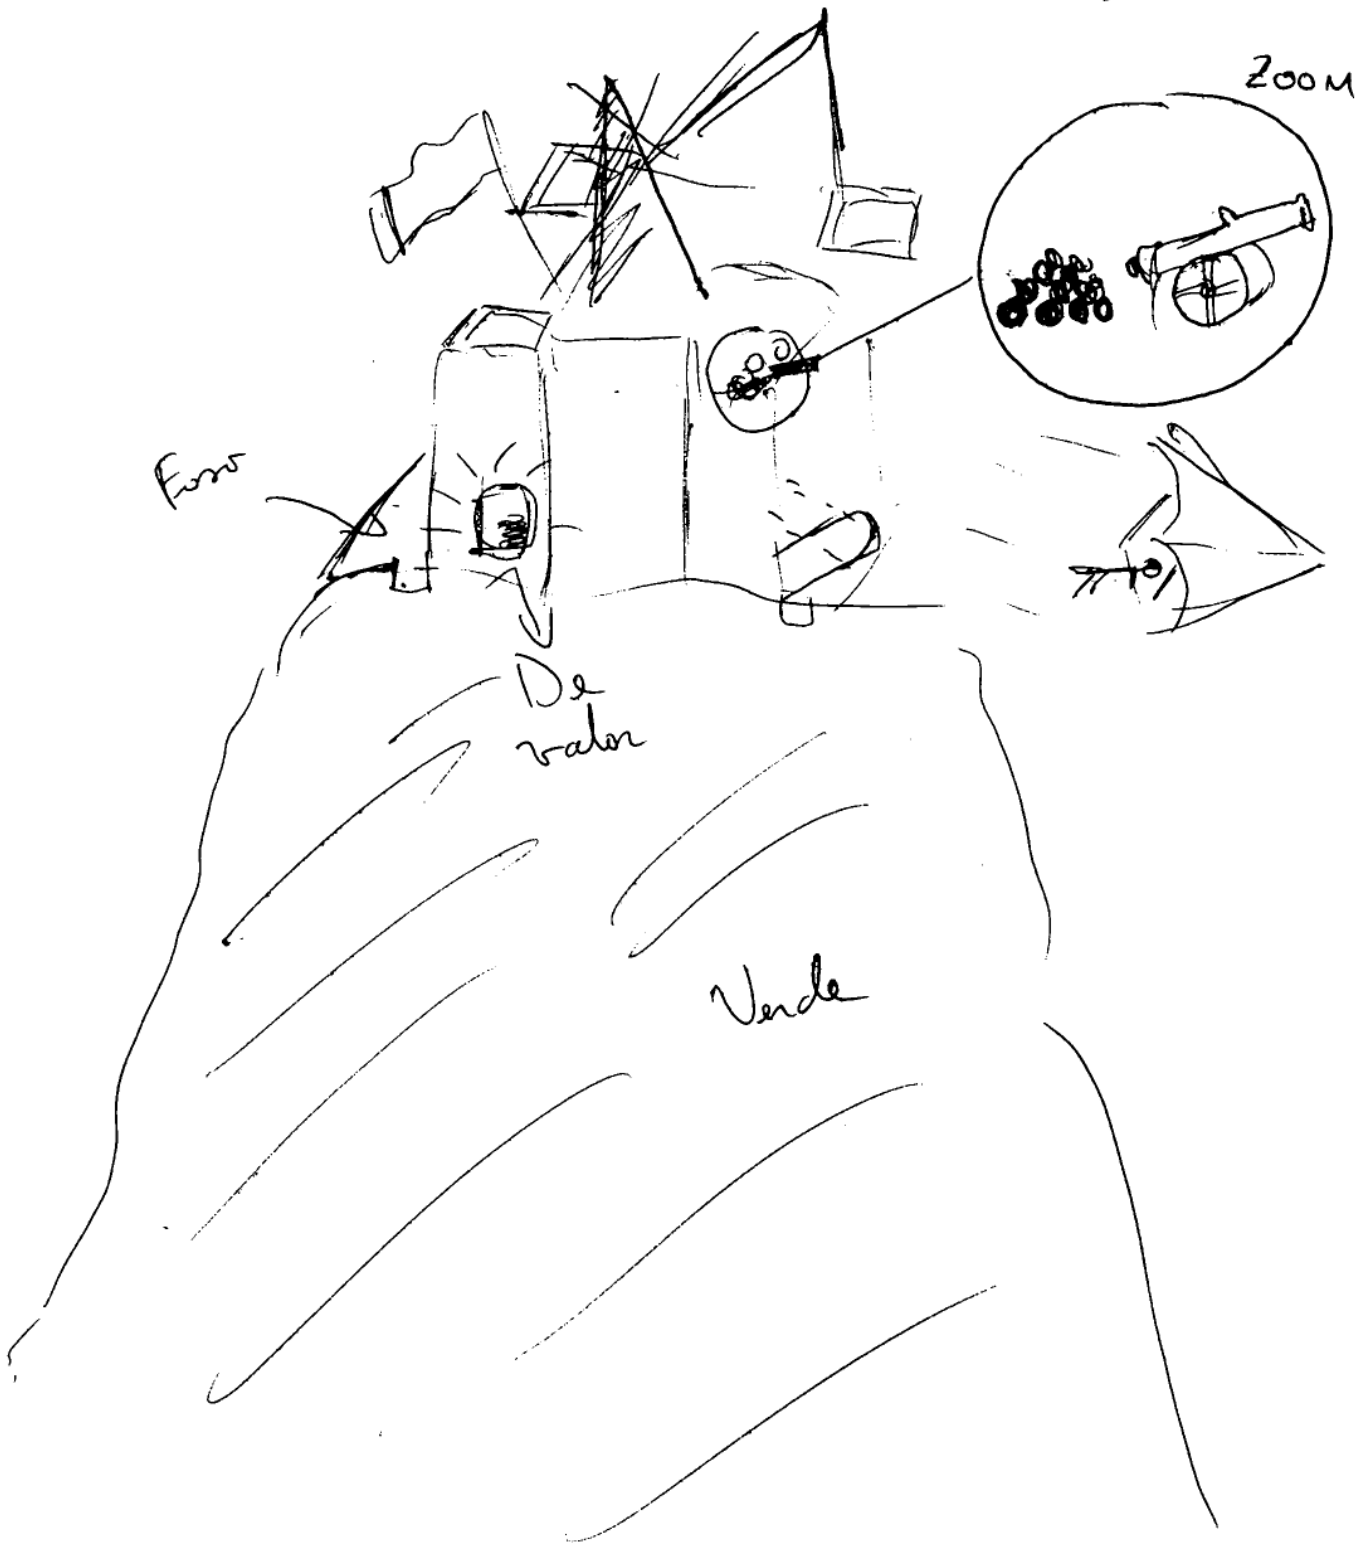

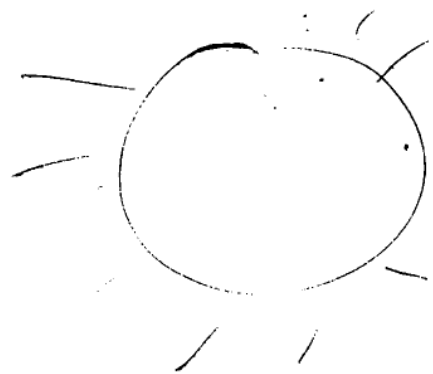

Castillo en lo alto de una montaña, contiene algo de poder, desde el se hace parapente o ala delta.

Tiene una especie de jiro y dos lodov. Uno muy solido con musgo y humedad, otro muy salado.

Sensación emocional. Justo al principio de diversión. se mantiene ahora. En alto, exterior.

Piedras pedrus en losas de un viejo castán. Lusa para proteger algo de valor bien protegido, antiguo. No tecnológico.

Entorno exterior, natural, solitario.
Marisco,

Tasked Intent

(if not viewer-self-tasked) A man is talking in the audio clip (see also text transcript) provided as feedback for this task. Please give me more information about the subject he is discussing.

Text Feedback

Please listen to this audio file for your primary feedback: [Real Audio Player Needed](#) Transcript: L. Ron Hubbard. From "Role of Earth", 30 October 1952: "...the Fourth Invader Force was here. The Fifth Invader Force came in to use this area, and the name of this solar system is Space Station 33. They started to use this area without suspecting that the Fourth Invader Force had been there for God knows how many skillion years, had been sitting down, and they have their installations up on Mars, and they have a tremendous, screened operation. The Martian operation is a fascinating operation, simply because it has gone into 100 percent holding force. And it does everything it does with tremendous coverson. It's sitting behind a defense screen of enormous size, and nobody - it's practically impossible to penetrate that, except as a thetan. And if you penetrate it as a thetan, you go through the Martian screen, and they got you! "
